

```
class Employee{
    float salary=4000;
}

public class Bank extends Employee{
    int increment =100000;
    float updatedSalary=salary+increment;
    public static void main(String args[]){
        Bank p=new Bank();
        System.out.println(p.salary);
        System.out.println(p.increment);
        System.out.println(p.updatedSalary);
    }
}
```
